Electromagnets range

We supply various electromagnets for different applications such as:

- Mechanical Engineering and Construction
- Automation Transport
- Handling Systems

The magnets can be used for holding, handling or control purposes.

Permanent Magnets

The diverse applications for permanent magnets usually require specific dimensions and materials. We will help you to select and optimize and provide permanent magnets from

all materials:

Hardferrite – Rare Earth Materials NdFeB, SmCo –
AlNiCo – Flexible and Plastic Bonded Materials

in all shapes:

Disc – Ring – Cylinder – Block – Segment etc.

and all magnetizations:

axial – diametral – lateral – radial – multipolar etc.

In addition we also offer the required components as housing, steel or plastic parts, pole shoes etc. up to the completely assembled unit.
